Summary

Results-driven software engineer with experience in designing scalable systems and integrating cloud solutions. Strong focus on backend development, APIs, and DevOps practices.

Technical Skills

Java, Spring Boot, Node.js, Express.js, AWS, Docker, Kubernetes, PostgreSQL

Work Experience

Backend Engineer — TechWave Solutions, Beirut (2022 – Present)
• Designed and maintained RESTful APIs using Node.js and Express.
• Implemented CI/CD pipelines with Docker and GitHub Actions.
• Optimized database queries in PostgreSQL, reducing response times by 30%.

Software Engineer Intern — CloudHub, Beirut (2021 – 2022)
• Assisted in migrating legacy systems to AWS cloud.
• Implemented unit and integration tests using Jest.

Projects

FleetTrack — Spring Boot, PostgreSQL
• Built a vehicle fleet management system with GPS tracking and reporting dashboards.

HealthLink API — Node.js, Express, MongoDB
• Developed a healthcare API with secure patient data storage and JWT authentication.

Education

Bachelor of Software Engineering — Lebanese International University (LIU), Beirut

Languages

Arabic — Native | English — Fluent
